Federation of European Neuroscience Societies

Founded in 1998 at the first Forum of European Neuroscience, the Federation of European Neuroscience Societies (FENS) is the main organisation for neuroscience in Europe. FENS currently represents 43 European national and single discipline neuroscience societies with close to 23,000 member scientists from 33 European countries. FENS promotes neuroscience research to policy-makers, funding bodies and the general public, both regionally and internationally.

British Neuroscience Association

The British Neuroscience Association (BNA) is the largest UK organisation representing all aspects of neuroscience.

The Aims of the BNA are to:

- promote neuroscience research
- organise lectures, symposia, meetings, events and reports
- advise on issues in neuroscience
- engage with the public and the media
- train neuroscientists and other neuroscience-related professionals
- represent UK neuroscience to Government, funding bodies and the media
agencies, and science administration, regulation and standards organisations.

The BNA is a growing learned society with around 1700 members. There are many benefits of membership, including free or discounted registration for events, discounted journals and books, the BNA Journal and many other offers.

**Conference: FENS Forum 2016**

**Copenhagen, 2-6 July, 2016**

**FENS Forum 2016: Copenhagen. 2-6 July.**

The FENS Forum is fast approaching and this year it will take place in the lively city of Copenhagen. The Forum scientific programme is designed to bring you engaging science from some of the world’s top neuroscientists, plus an impressive list of high-profile satellite meetings along with special interest and networking events. These offer opportunities for both young and established neuroscientists to expand their networks. We warmly invite you to have a look at the programme, which includes:

**Featured Lectures**
- The Presidential Lecture with Nobel Prize winners John O’Keefe (UK), Edvard Moser (Norway) and May-Britt Moser (Norway) (4 July)
• The Brain Cavalcade, with five winners of the Brain Prize from 2011-2015 (2 July)
• The FENS-EJN Awards winners Antonello Bonci (USA) Jerry Chen (Switzerland) Lars Schwabe (Germany) (6 July)
Satellite Events
• Cells, Circuits and Computation: Expanding the Horizons of Big Data Analysis – Allen Institute for Brain Science and HBP
• Mechanisms of neurodegeneration and progression: From mechanisms to therapies in Parkinson’s disease – Neurotoxicity Society
• Nutrition for the Ageing Brain – ILSI Europe Nutrition and Mental Performance Task Force
Special Interest Events
• Why do we need to use animals in research?
• Bridging Knowledge Session: Alpha-synuclein prion like forms as target for therapy in Parkinson’s disease and other synucleinopathies
• Code of Conduct and Ethics in Science
Come and join over 6,000 researchers sharing your passion for neuroscience, in the capital of Northern Europe – Copenhagen. Deadline for online registration: 20 June. Register here.

Society for Neuroscience

The Society for Neuroscience is the world’s largest organization of scientists and physicians devoted to understanding the brain and nervous system. The nonprofit organization, founded in 1969, now has nearly 38,000 members
in more than 90 countries and over 130 chapters worldwide.

What is the Federation of European Neuroscience Societies?

Federation of European Neuroscience Societies

Founded in 1998 at the first Forum of European Neuroscience, the Federation of European Neuroscience Societies (FENS) is the main organisation for neuroscience in Europe. FENS currently represents 43 European national and single discipline neuroscience societies with close to 23,000 member scientists from 33 European countries. FENS promotes neuroscience research to policy-makers, funding bodies and the general public, both regionally and internationally.

Information about the European Journal of Neuroscience

European Journal of Neuroscience (EJN) is published on behalf of the Federation of European Neuroscience Societies (FENS).
FENS was established in 1998 to advance research and education in the field of neurosciences in Europe. EJN publishes original research articles and reviews in the broad fields of molecular, cellular, systems, behavioral, and cognitive neurosciences.
